• CONSTRUCTION SECURITY •

Securing construction sites against theft, vandalism, and unauthorized access.

• EVENT SECURITY •

Comprehensive security solutions for crowd control and emergency response at events.

GOVERNMENT SECURITY

Solid Arms specializes in delivering high-security solutions for government facilities, departments, and personnel. Understanding the sensitive nature of these environments, we implement strict protocols to prevent unauthorized access and potential security breaches.

Our trained personnel are proficient in advanced surveillance, threat detection, and rapid response tactics to address any security concerns immediately. From local government buildings to federal facilities, our services are tailored to safeguard critical infrastructure, sensitive data, and high-profile officials. Solid Arms operates under stringent guidelines, ensuring that the security of government institutions is never compromised.

DOOR SUPERVISOR

The role of a door supervisor is critical in environments where crowd control, access management, and immediate conflict resolution are required. Solid Arms provides licensed, highly professional door supervisors for establishments like nightclubs, bars, retail outlets, and public events. Our supervisors are skilled in diffusing tension, managing large groups, and identifying potential threats before they escalate. They are trained in customer service as well as maintaining a secure environment, ensuring that guests feel welcome while preventing unauthorized or disruptive individuals from entering. They also carry out health and safety checks and ensure venue regulations are enforced, contributing to both a safe and positive experience for customers.

CLOSE PROTECTION

Solid Arms offers specialized close protection services designed to ensure the safety of high-profile individuals such as executives, celebrities, political figures, or VIPs.

Our highly trained close protection officers (CPOs) carry out threat assessments, security planning, and provide discreet yet effective personal protection. We focus on delivering a service that minimizes disruption to our clients' daily lives, whether they are in transit, attending public events, or in private settings. We offer armed and unarmed protection services, and our CPOs are proficient in evasive driving, surveillance detection, and emergency response. With an emphasis on discretion and flexibility, we create a secure bubble around our clients, allowing them to operate freely while staying protected at all times.

RETAIL SECURITY

Retail environments require constant vigilance to prevent theft, loss, and disruption. Solid Arms delivers comprehensive retail security solutions designed to protect merchandise, staff, and customers. Our services range from uniformed security guards stationed at key locations in-store to plainclothes loss prevention officers who monitor potential shoplifters discreetly. We implement state-of-the-art surveillance systems, electronic article surveillance (EAS), and access control measures that minimize theft and fraudulent activity. Our personnel are also trained to handle incidents such as vandalism, aggressive behavior, or emergencies, maintaining a safe environment for both shoppers and employees.

By reducing shrinkage and improving safety, Solid Arms helps retailers protect their bottom line while enhancing the customer experience.

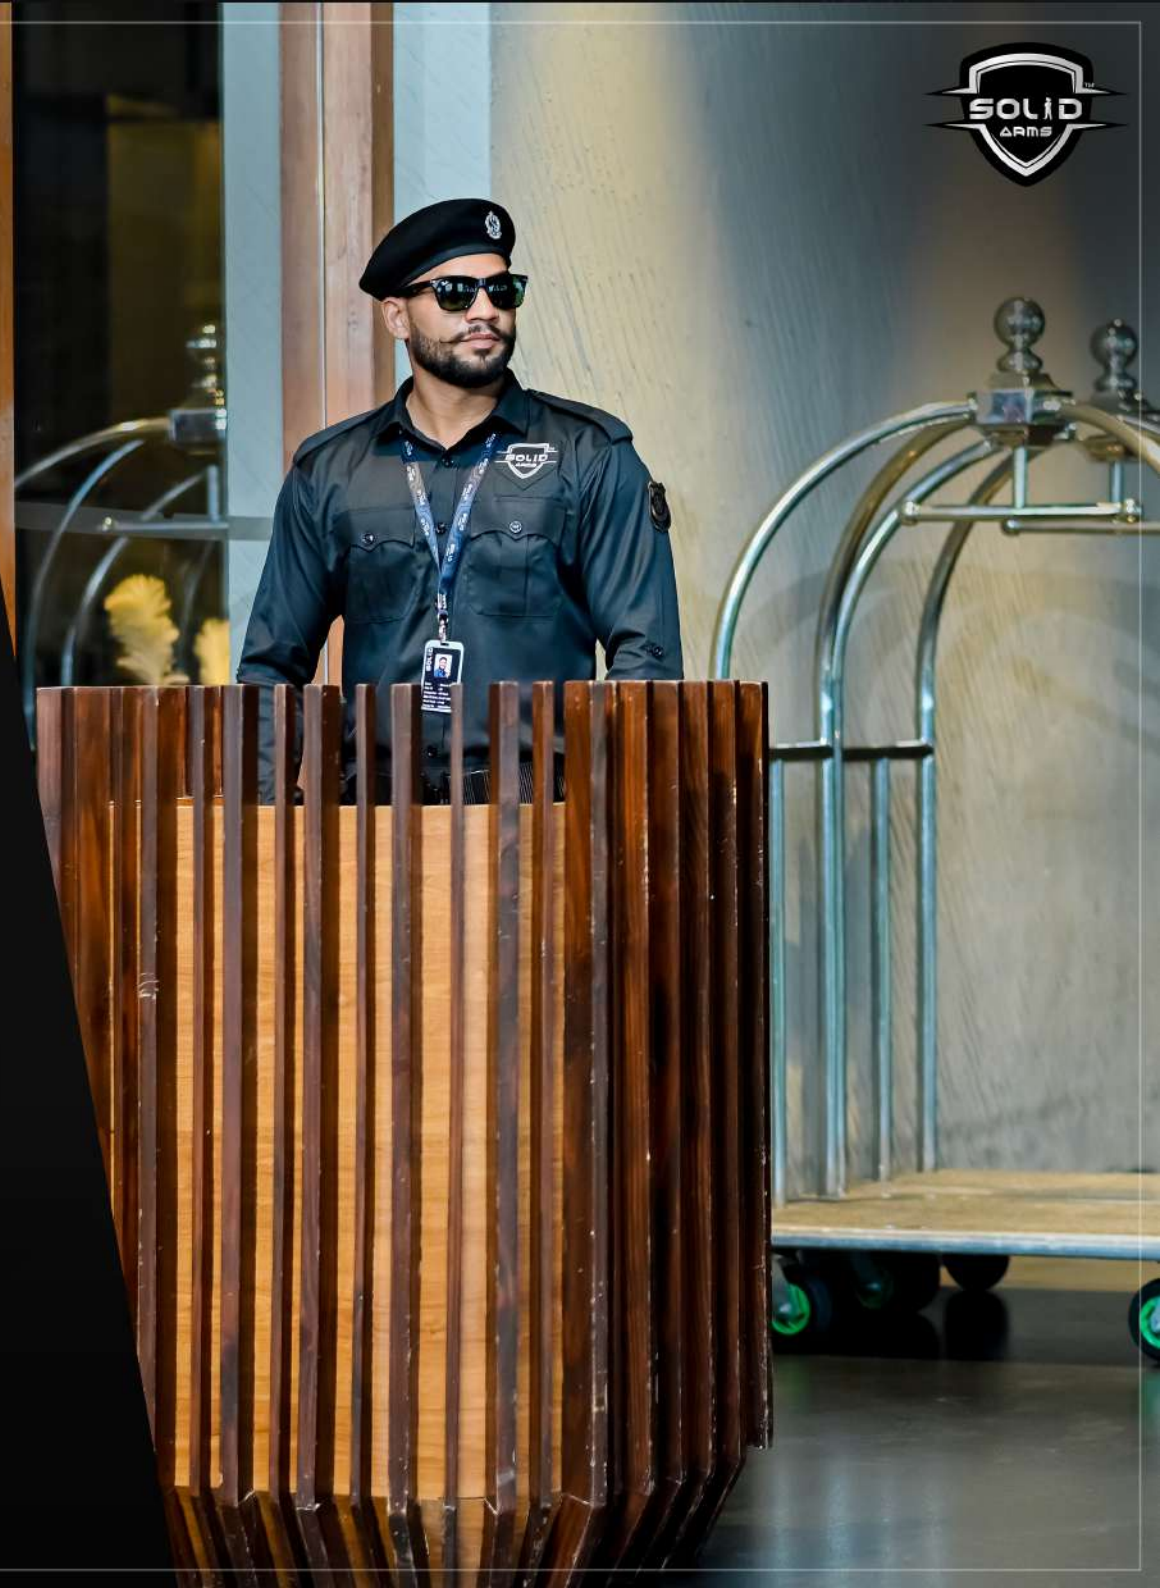

CONSTRUCTION SECURITY

Construction sites are highly vulnerable to theft, vandalism, and accidents due to the high value of materials and machinery. Solid Arms provides robust security solutions that include 24-hour on-site security officers, perimeter fencing, surveillance cameras, and mobile patrols. Our construction security personnel are trained to identify and manage risks, such as unauthorized access, equipment theft, and site safety violations. We monitor for both internal and external threats, helping to prevent theft of materials like copper, tools, or heavy machinery. Additionally, we implement strict access control systems to ensure that only authorized personnel are allowed on-site. By securing your construction site, Solid Arms ensures that your projects stay on track without the costly delays or losses that security breaches can cause.

HOTEL SECURITY

Solid Arms provides 24/7 security services tailored for hotels, resorts, and hospitality businesses. Understanding the unique dynamics of these environments, we focus on maintaining a welcoming yet secure atmosphere for both guests and staff. Our hotel security team is trained to handle issues such as unauthorized access, guest disputes, and emergency situations (e.g., medical emergencies, fire safety). We employ CCTV surveillance, keycard access systems, and roving security personnel to monitor hotel grounds, parking areas, and back-of-house operations. Additionally, we train our personnel to handle guest interactions with professionalism, ensuring that security measures do not disrupt the guest experience while offering swift response to any disturbances or incidents.

EVENT SECURITY

Managing security at events whether small gatherings or large festivals requires meticulous planning and expert execution. Solid Arms offers comprehensive event security services, from initial risk assessments to post-event reporting. We provide crowd control, access management, and emergency planning to ensure that every event runs smoothly. Our trained security officers are skilled in handling large crowds, managing entry points, conducting bag checks, and responding quickly to any incidents that arise. We focus on both preventing potential risks and offering real-time solutions in the case of emergencies, such as medical issues or public disturbances. Our goal is to allow event organizers and attendees to enjoy a safe and secure environment, free from security concerns.

INDUSTRIAL SECURITY

Industrial environments pose complex security challenges due to the presence of valuable materials, equipment, and proprietary processes. Solid Arms delivers tailored security strategies to safeguard factories, manufacturing plants, warehouses, and distribution centers. Our industrial security solutions include access control systems, perimeter fencing, video surveillance, and patrolling guards to deter unauthorized entry and prevent theft or sabotage. We are adept at working in high-risk environments, conducting risk assessments, and developing incident response plans to ensure smooth operation. Our team is also trained to monitor hazardous areas, protecting both the workforce and company assets from internal and external threats.

BANK SECURITY

At Solid Arms, we provide elite Bank Security Services designed to safeguard your institution's most valuable assets with precision and vigilance.

ARMED SECURITY; Our highly trained armed personnel act as a powerful deterrent, ensuring maximum safety for employees, customers, and sensitive areas.

24/7 SURVEILLANCE: We offer continuous monitoring and rapid response, protecting your bank day and night from potential threats.

CASH IN TRANSIT: With armored vehicles and expert armed escorts, we ensure the secure and seamless transport of cash and valuables between locations.

ATM PROTECTION: Our advanced patrol and monitoring solutions prevent tampering, theft, and unauthorized access, keeping your ATMs and customers safe.

CHOOSE *SOLID ARMS* for trusted, unwavering protection tailored to your bank's needs.

WHY US ?

Solid Arms offers tailored security solutions backed by highly trained professionals and cutting-edge technology. We are reliable, responsive, and focused on delivering 24/7 protection. With a proven track record across diverse industries, we prioritize your safety through customized plans, fast crisis response, and a client-first approach. Trust Solid Arms for comprehensive, dependable security that gives you peace of mind.
